THE AXIS IS A TAPERED SHOE THAT LOOKS DELICATE, LIGHT AND BEAUTIFUL EN POINTE. IT IS A QUIETER SHOE WITH CUSHIONED PLEATS TO REDUCE NOISE. ITS AESTHETIC FEATURES INCLUDE A U SHAPED VAMP, FLAT STREAMLINED TOE AND LOWERED SIDES AND ANGLED SEAMING TO MINIMISE BAGGINESS AND CREASING.

THE AXIS IS MADE ON A CURVED LAST SO THERE ARE MORE CONTACT POINTS BETWEEN IT AND THE DANCER'S FOOT. MOREOVER THE PLEATING ON THE UNDERSIDE OF THE PLATFORM IS FINE AND FLAT, AND THE TRANSITION FROM THE UNDERSIDE OF THE PLATFORM TO THE PLATFORM ITSELF IS SOFTENED WITH A SLIGHT CURVE FOR EASE WHEN ROLLING THROUGH EN POINTE AND IN RELEVÉ. SO A DANCER REALLY FEELS LIKE THE AXIS IS WORKING WITH HER FOOT.

THE AXIS COMES WITH A TMT TOE BOX AND A TMT SHANK.

#### TMT TOE BOX

TMT IS AN ADVANCED FORMULA, HEAT ACTIVATED PASTE. TMT ENABLES A DANCER TO DRASTICALLY ACCELERATE THE BREAKING-IN PROCESS BY MOLDING THE AXIS TO THE UNIQUE CONTOURS OF HER FEET FROM THE VERY FIRST WEAR.

THE AXIS IS LABELLED LEFT AND RIGHT. ONCE A DANCER HAS ACTIVATED TMT WITH EACH SHOE IN ACCORDANCE WITH THE TMT INSTRUCTIONS LEAFLET EACH SHOE WILL BE MOLDED TO EITHER A DANCER'S RIGHT OR LEFT FOOT.

#### TMT SHANK

THE AXIS IS MADE WITH A PLASTIC INSOLE. THERE ARE 3 DIFFERENT STRENGTHS: PL3 IS THE SOFTEST, PL4 IS MEDIUM STRENGTH AND PL5 IS THE STRONGEST.

THE CURVE OF THE PLASTIC INSOLE COMPLEMENTS THE CURVE OF THE LAST THE AXIS IS MADE ON, EVENLY DISTRIBUTING THE CURVE IN THE SHOE. AS SUCH THERE IS GREATER ARTICULATION OF THE WHOLE CURVE OF THE FOOT. A DANCER ALSO HAS FINER CONTROL WHEN EN POINTE AS THE PLASTIC INSOLE IS SENSITIVE AND RESPONSIVE.

PL3, PL4 & PL5 CAN BE MODIFIED IN ACCORDANCE WITH THE TMT INSTRUCTIONS LEAFLET.

IN TRIALS TO DATE THE PLASTIC INSOLES HAVE LASTED AND RETAINED THEIR SHAPE LONGER THAN TRADITIONAL INSOLES.
