

## S2130 – SONATA MKII

### POINTE SHOE

TARGET MARKET:  
**BEGINNER THROUGH TO PROFESSIONAL**

AVAILABLE IN SIZES:  
**15 - 9**

WIDTHS:  
**A, B, C, D, E**

COLOURS:  
**PINK**

THE SONATA, LIKE SERENADE AND SUPRIMA, HAS A TAPERED HEEL FOR A SNUG FIT. THE PLATFORM IS AS WIDE AS SERENADE BUT TALLER WHICH MAKES IT A GOOD BALANCING SHOE. THE SONATA HAS MANY DISTINCT FEATURES. THE FIRST BEING, THE BOX IS SLIGHTLY SHORTER, TO ALLOW FOR AN EASIER DEMI-POINTE. THE BOX ALSO CONTAINS A CUSHION WITHIN THE PLEATS TO CUT DOWN ON NOISE AND A SPONGE INSIDE THE TOE AT THE PLATFORM FOR EXTRA COMFORT AND PROTECTION.

THE SHANK IS MADE UP OF A 6-IRON BOARD AND LEATHER BOARD CENTERPIECE. THE LEATHER BOARD IS MALLEABLE AND LESS LIKELY TO "SNAP" WHEN BROKEN. ANOTHER DIFFERENCE IN THE SHANK IS THAT IT CONTAINS NO TACK OR GLUE ON THE HEEL. THIS ALLOWS THE SHANK TO BEND EASIER AT 3/4, REDUCING THE PRESSURE ON ITSELF AND THE SHOE. RESULTING IN THE DANCER BEING SUPPORTED HIGH AND STRAIGHT UNDER THE ARCH WITHOUT HAVING TO FIGHT TO GET THERE. THE AVAILABLE WIDTH FITTINGS FOR THE SONATA ARE A, B, C, D AND E AND REQUIRE THE DANCER TO FOLLOW BREAK-IN INSTRUCTION A.

#### **MKII**

THE 4 IMPROVEMENTS TO THE ORIGINAL SONATA

- 1 STREAMLINED SATIN UPPER** - SIDES OF SATIN UPPER HAVE BEEN LOWERED TO REVEAL MORE OF DANCERS FOOT ENHANCING AESTHETIC, PROVIDING A MORE MODERN, STREAMLINED LOOK AS WELL AS REDUCING BUNCHING OF SATIN WHEN ON POINTE.
- 2 NEW GENERATION INSOLE** IS VIRTUALLY UNBREAKABLE CREATING HARDER WEARING, LONGER LIFE, BETTER VALUE FOR MONEY, LIGHTER, MOULDS QUICKER TO THE SLOPE OF A DANCERS ARCH GIVING GREATER SUPPORT WHEN ON POINTE. ALSO FORCES THE SHOE TO SIT FLATTER ON STAGE REDUCING ROCKING AND ENHANCING STABILITY.
- 3 LONGER WING PUFF:** REDUCES CREASING AND BUNCHING OF SATIN WHEN ON POINTE
- 4 ADDITIONAL PADDING UNDER PLEATING** MAKES THESE SHOES QUIETER BY CUSHIONS IMPACT ON STAGE REDUCING NOISE

# BREAK IN INSTRUCTIONS FOR POINTE SHOES

**TO GET THE BEST OUT OF A BLOCH POINTE SHOE, PLEASE ADHERE TO THE BELOW TECHNIQUES FOR "BREAKING IN" THE SHOE. TECHNIQUE A AND TECHNIQUE B ARE VERY SIMILAR; THEY DIFFER DUE TO TWO DIFFERENT PASTE TYPES AND TWO DIFFERENT CONSTRUCTION TECHNIQUES.**

## **BREAK IN TECHNIQUE A**

A LITTLE EXTRA TIME NEEDS TO BE TAKEN TO BREAK IN THESE SHOE TYPES. THEY ARE MADE WITH A HARDER PASTE THAN TECHNIQUE B AND ARE THEREFORE SUSCEPTIBLE TO "SNAPPING" IF TREATED ROUGHLY AT FIRST. ONCE BROKEN CORRECTLY THEY HAVE A LONG LIFE SPAN.

DOING BARRE IS THE BEST WAY TO BREAK IN A POINTE SHOE. WE UNDERSTAND HOWEVER THAT YOU CAN'T STAND AT THE BARRE WITH A NEW PAIR OF POINTE SHOES AND EXPECT TO DO A TENDU, SO THE SHOE NEEDS TO BE PREPARED FOR BARRE BY GENTLY SOFTENING THE SHANK AND BOX BY HAND. CONCENTRATE ON THE DEMI-POINTE AREA OF THE SHANK BEING CAREFUL NOT TO CRUSH THE BOX. THEN WORK YOUR WAY UP TO THE HEEL GENTLY MASSAGING THE SHANK UNTIL IT IS AT A POINT WHERE TENDU AND RELEVÉ TO DEMI-POINTE IS COMFORTABLE. SOFTENING THE BOX IS NOT ALWAYS NECESSARY AND IS LEFT UP TO THE INDIVIDUAL. IF SOFTENING IS NECESSARY THEN CONCENTRATE ON GENTLY SOFTENING THE SIDES OF THE BOX. LOTS OF DANCERS STAND ON THE TOP OF THE BOX IN ORDER TO SOFTEN AND WIDEN IT. WE ADVISE THAT STANDING ON THE BOX OR SQUASHING THE BOX CAN PERMANENTLY DAMAGE THE SHOE, SO PLEASE DO SO AT YOUR OWN RISK. IF YOU MUST STAND ON THE BOX, YOU NEED TO CONCENTRATE THE PRESSURE ON EITHER SIDE OF THE BOX CENTRE. THIS IS IMPORTANT BECAUSE THE TOP CENTRE OF THE BOX IS THE WEAKEST POINT AND PRONE TO THE MOST DAMAGE IF STOOD ON. ONCE THE SHOES ARE READY FOR BARRE, 1 TO 2 HOURS BARRE WILL BE A SUFFICIENT TIME TO SHAPE THEM TO YOUR FOOT. AT THIS POINT THE SHOES WILL BE EVENLY SOFTENED WITH NO WEAK POINTS RESULTED FROM INCORRECT BREAKING TECHNIQUE.

## **BREAK IN TECHNIQUE B**

THESE SHOES ARE MADE FROM A PASTE THAT IS DESIGNED TO SOFTEN WHEN MOISTURE IS APPLIED. THE TECHNIQUE HERE IS SIMPLE TO UNDERSTAND. FOLLOW BREAK IN TECHNIQUE A. AFTER 1 TO 2 HOURS BARRE THE SHOE WILL BECOME MOIST AND SHAPE ITSELF TO THE DANCERS FOOT. ONCE THE SHOE DRIES IT WILL HAVE SET IN THE SHAPE OF THE DANCERS FOOT. AT THIS POINT IT IS POSSIBLE TO APPLY SHELLAC TO THE INSIDE OF THE BLOCK AND SHANK. THIS WILL NOT ONLY HARDEN THE SHOE IN ITS CURRENT SHAPE, BUT ALSO STOP ANY MORE MOISTURE ENTERING THE SHOE (SEE SHELLAC SECTION IN FAQ). SO WE ARE LEFT WITH A STRONG SHOE, MOLDED IN THE SHAPE OF THE INDIVIDUAL DANCERS FOOT ON THE INSIDE, WHILST LEAVING A QUIET EXTERIOR.
